Education

System Analyst - Bachelor
2015 - 2018
National University of La Plata
(Argentina)

About

I develop websites and web applications using my front and back end skills. When dealing with a project I pay attention to the smallest details addressing problems with patience. In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancements.

Experience

2021-02 - Present

Clio - Web Developer (Denmark)

Working in the frontend team responsible for creating and updating the newest version of Clio's SaaS e-learning platform.

- Planning and implementation of a decentralized and modularized package-based architecture to allow maximum scalability to the product.
- Building highly performant React components following industry best practices.
- Implementing unit tests to achieve a high test coverage ratio with Jest. Also implementing E2E tests with Java and Selenium.
- Implementing several node.js scripts to improve development speed and performance.
- Improving the platform semantics to meet industry and company standards for SEO and Accessibility.

2017-02 - 2020-03

Agminen - Web Developer (Argentina)

Responsible for participating in the full life cycle of new website development projects, and for implement and maintaining best practice procedures in all areas of work

- Frontend development using HTML, CSS, Javascript, React and Gatsby.
- Backend development using Node.js, Express.js.
- Database technologies like MySQL, PostgreSQL, and MongoDB.
- Worked closely with the designer. Converted Photoshop, Adobe XD files to HTML, CSS & Javascript.
- Analyzed requirements and designed, developed and implemented software applications for multiple websites.
